

Product Data Sheet

High Intensity Reflective Tape - 10 Year, 50 Yards Long (HXREF)

The High Intensity Reflective Tape is our Prismatic Retro Reflective tape, it is an economical alternative to our DOT series. This honeycomb prismatic reflective tape created for safety applications such as safety cones, trailers where increased visibility is required. Encapsulated-lens, pressure sensitive adhesive-coated sheeting with an easy liner paper, intended for increasing visibility at night where safety is necessary.

Meets or exceeds requirements of ASTM D4956 (Type III)

- Reflective Technology: Glass beads-encapsulated
- Base material: Acrylic (PMMA)
- Color: Silver/White, Yellow, Red, Blue, Green
- Sizes: 1" x 150 ft; 2" x 150 ft, customized
- Backing: Silicone coated paper, 0, 14mm. or Polypropylene film 0,075mm
- Durability: 7-10 years
- Application temperature: 18°C - 28°C (64.4°F - 82.4°F)

Application: Curved and flat surface (such as Aluminum, Zinc coated steel plate) which must be cleaned from dust, grease or any contamination which could affect the adhesion of the material. Not recommended for unpainted stainless steel surfaces.

Also known as: High Intensity Grade Reflective Tape, High-Intensity Reflective Tape, Honeycomb Reflective Tape, Retro-Reflective Tape, Retroreflective Tape

NOTE: The physical properties listed above are typical test results obtained from a series of laboratory tests and should not be used for the purpose of writing specifications. Before using this product, user shall determine the suitability of the product for his/her use; and user assumes all risks and liabilities in connection therewith. All test procedures used are in accordance with ASTM and PSTC methods.
